Benita Auer is a Student Research Assistant at the Institute of Public Health, Medical Decision Making and Health Technology Assessment at the Department of Public Health, UMIT TIROL - University for Health Sciences and Technology in Hall in Tirol, Austria.

She completed her secondary education with a focus on tourism-related subjects and gained work experience in the tourism sector and the local tourism association. Currently, she is studying Geography at the University of Innsbruck. Through her Student Assistant position at UMIT TIROL, she is gaining insights into research processes and methods related to environmental and climate aspects in Public Health.

Her current interests include public health, climate change and health, the relationship between environment and society, and administrative processes in academic settings. As a student assistant, she is particularly interested in understanding how study programs are organized and how management support teaching and learning.
