Katharina Reber is a Junior Scientist at the Institute of Public Health, Medical Decision Making and Health Technology Assessment at the Department of Public Health, Medical Decision Making and Health Technology Assessment, UMIT TIROL - University for Health Sciences and Health Technology in Hall in Tirol, Austria.

She earned a Bachelor of Arts in health management from the University of Applied Sciences 'Deutsche Hochschule für Prävention und Gesundheitsmanagement' (2013–2016), followed by several years of experience in Health & Safety with a focus on corporate health management.
She completed a Master of Science in Global Public Health at Queen Mary University of London in 2024.

Her main research is in public health with specific interests in primary prevention, screening, health equity and artificial intelligence applications. Her work focuses on systematic reviews and evidence synthesis to inform public health policy and practice. She actively disseminates public health research via social media, creating accessible summaries and visual materials to broaden reach and impact. She also supports networking and project coordination by organizing collaborative meetings, facilitating cross-disciplinary dialogue, and strengthening partnerships across research, clinical, and policy communities.
