Sabine Hall is a Junior Scientist at the Institute of Public Health, Medical Decision Making and Health Technology Assessment at the Department of Public Health, Medical Decision Making and Health Technology Assessment, UMIT TIROL - University for Health Sciences and Health Technology in Hall in Tirol, Austria.

Sabine is a qualified dietitian with a Master's degree in Public Health from Charles Darwin University, Darwin, Australia and over twenty years of experience in health research. Her professional focus has been on epidemiology, public health, and the coordination and management of clinical trials. After her studies, Sabine spent four years working in health economics, epidemiology, impacts of alcohol and other drug use, Indigenous health and chronic disease at the Department of Health in Darwin, Australia. She coordinated a nationwide cohort study on cancer risk of firefighters at Monash University (2011-2015), and led a nationwide project on alcohol prevention among children and adolescents (2015-2017) at the Australian Catholic University, Melbourne, Australia. She also managed a national youth study (2017 – 2021) providing evidence-based recommendations addressing political, economic, and cultural challenges affecting Australian youth. Before starting her position at UMIT TIROL, Sabine managed phase II and III trials at Assign Data Management and Biostatistics, Innsbruck, Austria.

Sabine has experience in the implementation of both quantitative and qualitative research methodologies. She has co-authored several peer-reviewed publications in the areas of mortality and cancer incidence, adolescent health, and alcohol and other drugs research. Her main research interests are public health, cancer prevention, occupational and environmental health, and adolescent health.
