

## Registration Fee

- **Course fee academic/public** ..... Euro **1,450**  
Early booking fee until 24 February 2025 Euro 950
- **Course fee commercial** ..... Euro **2,950**  
Early booking fee until 24 February 2025 Euro 2,450

### ▪ Discounts

#### **Group Registrations – Save 15%**

Register with three or more colleagues and save!

#### **Alumni – Save 20%**

UMIT TIROL Alumni or if you have previously participated in a Continuing Education Program Course on HTADS, you are eligible for a discount on this course.

Course fees include a comprehensive syllabus, an extensive binder with background reading material, a course certificate, snacks and lunch, but not travelling and accommodation. Certificates will be provided to all participants. You can earn 3 ECTS credits if you pass the exam at the end of the course.

**Registration for this course can be made online. Payment details and cancellation policy are available on [www.htads.org](http://www.htads.org)**  
**In case of international travel restrictions, the Modeling Approaches for HTA Course will be organized as synchronous online course.**

## Quotes from Recent Participants

*“Very good overview of different modeling approaches, good number of theory and practical input”*

*“Huge review of modeling techniques”*

*“High level”*

*“Very good tutorials”*

*“Individual assistance during the exercise sessions”*

*“Very professional”*

*“High quality of the course”*

# Modeling Approaches for HTA

A Practical Hands-on Workshop

**New Feature: International modeling  
experts panel session**

# What is the Continuing Education Program on Health Technology Assessment & Decision Science (HTADS)?

Prof. Uwe Siebert, MD, MPH, MSc, ScD  
HTADS Program Director

## Health Technology Assessment (HTA)

has been defined by the International Network of Agencies for HTA (INAHTA) as “a multidisciplinary field of policy analysis studying the medical, economic, social, and ethical implications of development, diffusion and use of health technologies (e.g., drugs, devices, surgical procedures, prevention techniques)”. In conducting HTA, the discipline of decision science has become increasingly relevant.

## Decision Science (DS)

is the application of explicit and quantitative methods to analyze decisions under conditions of uncertainty (e.g., meta-analysis, decision-analytic modeling, cost-effectiveness analysis). In recent years, HTA and DS have become very important to health care policy-makers. In order to keep pace with these developments, the UMIT TIROL – HTADS Program was designed to provide excellent quality education and comprehensive training in the key issues of HTA and DS for anyone involved in the health sector. The course faculty is drawn from leading international experts from universities, industry, HTA agencies and representatives from other relevant areas who are committed to provide independent teaching of state-of-the-art principles.

## Target Audience

The 4-Day Certified University Course in Modeling Approaches for HTA is created for members of

- Healthcare & health policy organizations, national HTA agencies
- Pharmaceutical & medical device industry
- Academia and research institutions
- Health insurances/sickness funds
- Consultancy organizations

## Course Description

There are a number of other modeling courses focusing on either theory or only selected modeling approaches. In contrast, our course combines theoretical concepts with practical hands-on exercises comprising five different modeling techniques applied in Public Health and HTA. We will use four different software packages depending on the modeling area. Real world case examples from different acute and chronic diseases will be discussed.

## Covered topics

- Modeling overview and taxonomy
- Decision trees, state-transition models (Markov models) and partitioned survival models
- Handling uncertainty and variability
- Microsimulation models
- Discrete event simulation models
- Handling individual behavior and waiting lines
- Agent-based models
- Handling contact and network structure
- Infectious disease models
- Handling dynamic transmissions and herd immunity
- International modeling expert session (interactive panel discussion)

For this course, basic knowledge of spreadsheet programs (e.g., MS Excel) is recommended. Experience in other software tools used in the workshop (e.g., TreeAge, Arena, Berkeley Madonna) is not required. The course language is English.

## Course Faculty

### Assoc.-Prof. Beate Jahn, PhD

Associate Professor and Head of the Program for Personalized and Precision Medicine, Past President ISPOR Chapter Austria, Former Vice President of the Society for Medical Decision Making (SMDM), Institute of Public Health, Medical Decision Making and HTA, UMIT TIROL – University for Health Sciences and Technology, Hall in Tirol, Austria

### Professor Emeritus, Ron Goeree, MA

Department of Clinical Epidemiology and Biostatistics, McMaster University, Canada, Goeree Consulting Limited, Canada

### Prof. Mirjam Kretzschmar, PhD

Professor in Dynamics of Infectious Diseases, Julius Centre for Health Sciences & Primary Care, University Medical Centre Utrecht, Utrecht, The Netherlands; Senior scientific advisor at the National Institute of Public Health and the Environment (RIVM), Bilthoven, The Netherlands.

### Prof. Uwe Siebert, MD, MPH, MSc, ScD

Professor of Public Health (UMIT TIROL), Adjunct Professor of Epidemiology and Health Policy & Management (Harvard University), Former President of the Society for Medical Decision Making (SMDM), Chair, Dept. of Public Health, Health Services Research and HTA, UMIT TIROL – University for Health Sciences and Technology, Hall in Tirol, Austria

## Further HTADS Courses

### Introduction to Statistics with R

An Applied 3-Day Hands-On Workshop  
3-Day Certified University Course, 23-25 October 2024

### Scientific Reporting and Writing

3-Day Certified University Course, 05-07 December 2024

### Introduction to Health Technology Assessment and Health Economics

3-Day Certified University Course, 27-29 January 2025

### Winter School in Clinical Epidemiology

5-Day Certified University Course, 10-14 February 2025

### Introduction to Systematic Reviews and Meta-Analysis – ONLINE

3-Day Certified University Course, 20-22 March 2025

### Causal Inference for Assessing Effectiveness in Real World Data and Clinical Trials

A Practical Hands-on Workshop,  
5-Day Certified University Course, 19-23 May 2025

### Scientific Reporting and Writing – ONLINE

3-Day Certified University Course, TBD May 2025

### Advanced Systematic Reviews and Meta-Analysis – ONLINE

3-Day Certified University Course, 12-14 June 2025
